# Controlando pela tela do celular

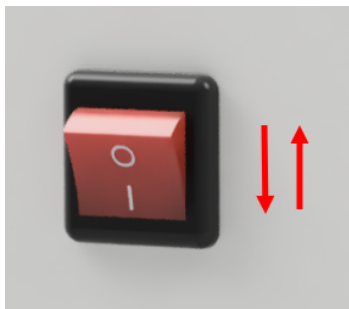

Sua LEDWindow pode ser ligada e desligada pelo simples toque da tela do seu celular!

**Importante:** essa etapa é obrigatória, caso também queira controlar a LEDWindow pela Alexa ou Google:

1. Instale o aplicativo “JWCOM” no seu celular:

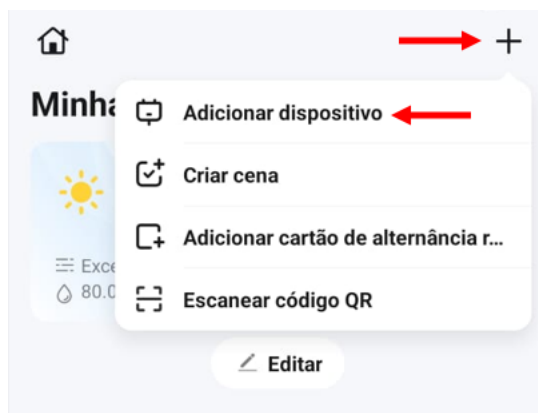

2. Registre-se no aplicativo e dê as permissões necessárias.
3. Ligue e desligue o botão vermelho da sua LEDWindow 7 (sete) vezes, **rapidamente**. Isso irá colocá-la em modo pareamento.

7x

4. Clique no “+” e “adicionar dispositivo”:

5. Conecte-se na sua rede wi-fi:

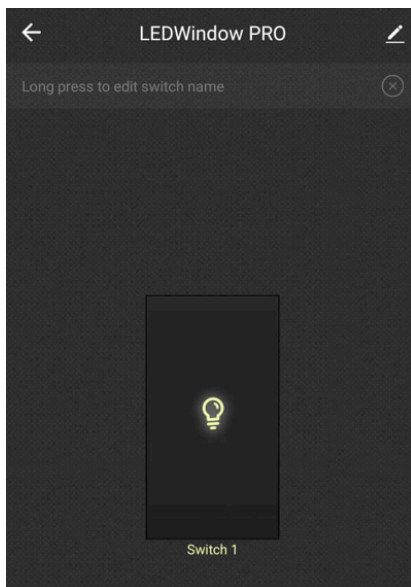

6. Após alguns segundos, irá encontrar o Mini Switch Wifi (pode aparecer comum nome ligeiramente diferente):

7. Clique no lápis a direita, troque o nome para “LEDWindow” e clique em “concluído”

8. Parabéns! Agora é só clicar no ícone na tela do seu celular para ligar e desligar sua LEDWindow!

# Controlando pela Alexa

Sua LEDWindow pode ser ligada com um “- Alexa, ligue minha LEDWindow”! Veja como:

1. **Etapla importante!** Instale o aplicativo JWCOM seguindo os passos do tutorial anterior: **“Controlando pela tela do celular”**. Sem esses passos, a Alexa não irá funcionar.

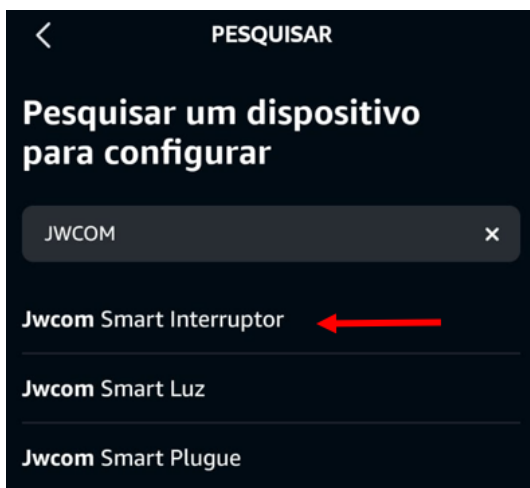

2. Faça login no seu aplicativo Alexa

3. Clique no “+” para adicionar um dispositivo:

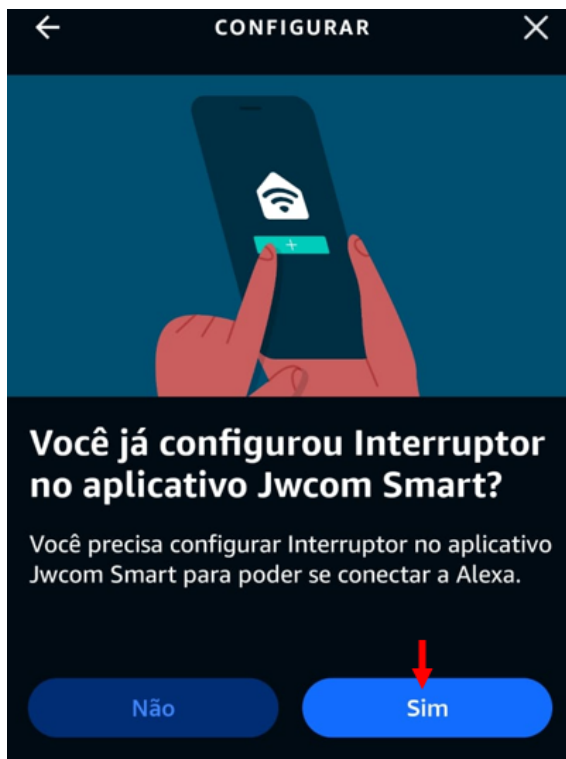

4. Clique em “dispositivo” e procure por “**Jwcom Smart Interruptor**”. Quando encontrar, clique no nome para iniciar a descoberta:

5. Ligue sua LEDWindow e confirme:

6. Confirme que você já conectou a LEDWindow no aplicativo JWCOM:

7. Confirme que você consegue controlar a LEDWindow pelo JWCOM:

8. Agora, a Alexa irá se conectar a conta que você criou no JWCOM:

9. Quando solicitado, informe o e-mail que você cadastrou na conta JWCOM, sua senha e vá clicando “Next Step”:

Brazil ▼

JWCOM SMART

Phone Number/Email Address ↔  
→ contato@ledwindow.co

Type your password here ▼  
→ .....

→ Next Step

## 10. Dê autorização a Alexa para controlar a conta JWCOM:

contato@ledwindow.co

Alexa by Amazon will be able to:

Receive your public profile  
Control your devices over internet

Authorize

Deny

You can revoke permission at any time.

11. A Alexa irá buscar o dispositivo através do JWCOM e se conectar a sua LEDWindow. Clique em “Avançar”:

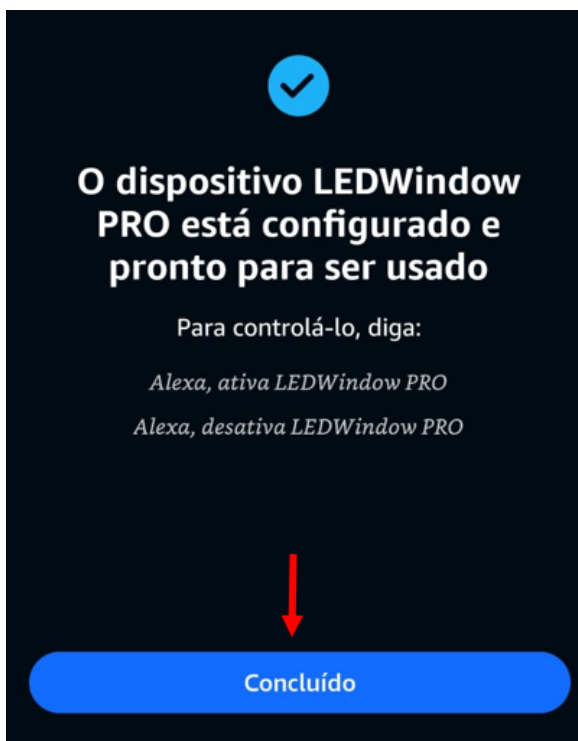

12. Se quiser, dê um nome para a Alexa reconhecer sua LEDWindow. Sugiro “LEDWindow” e o nome do modelo, fica ótimo! Ex.:

The screenshot shows a dark-themed settings window titled 'CONFIGURAÇÃO' with a close button (X) in the top right corner. The main heading is 'Renomear dispositivo' (Rename device). Below it, a subtitle reads 'Use o nome fornecido ou digite um novo nome' (Use the provided name or type a new name). A text input field contains the text 'LEDWindow PRO'. At the bottom, there are two buttons: 'Pular' (Skip) on the left and 'Atualizar Nome' (Update Name) on the right.

13. Sua LEDWindow pode ser controlada pela Alexa agora! Clique em “concluir”, e é isso!

Olha a dica! Você também pode dizer:

“- Alexa, ligue minha LEDWindow em 10 minutos”  
(seus clientes irão adorar!). Ou mesmo:

“- Alexa, deixe minha LEDWindow ligada por duas horas” (uma boa forma de programar o tempo dos seus ensaios).

# Controlling via the cell phone screen

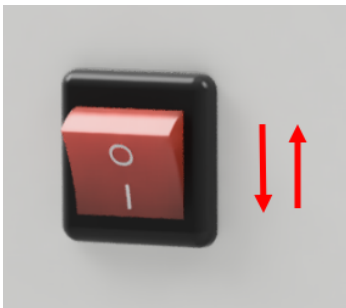

Your LEDWindow can be turned on and off with a simple tap on your phone's screen! **Important:** this step is mandatory if you also want to control the LEDWindow via Alexa or Google.

9. Install the “JWCOM” app on your cell phone:

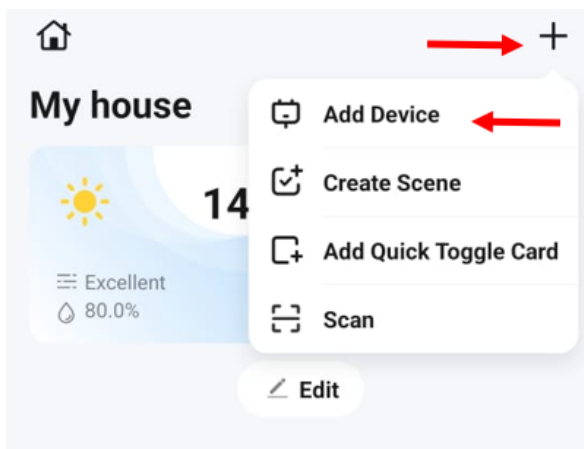

10. Register in the application and grant the necessary permissions.

11. Turn the red button on your LEDWindow on and off 7 (seven) times, **quickly**. This will put it in pairing mode.

7x

12. Click on “+” and “add device”:

13. Connect to your Wi-fi network:

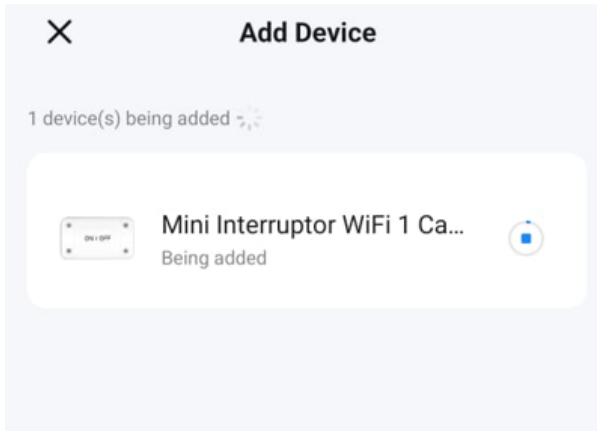

## Enter Wi-Fi Information

Choose Wi-Fi and enter password

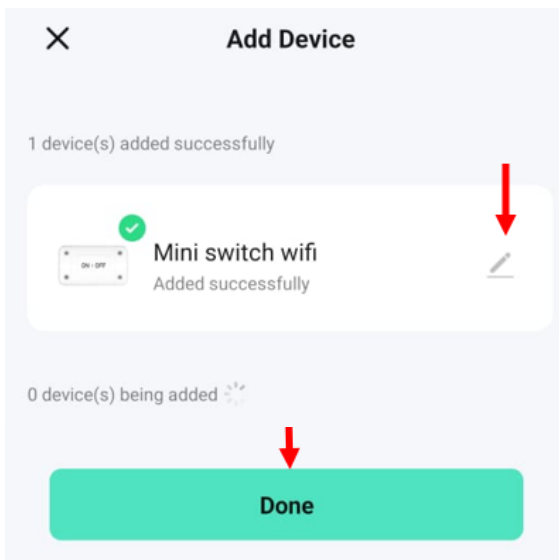

LED WINDOW\_2.4G [Select Wi-Fi](#)

.....

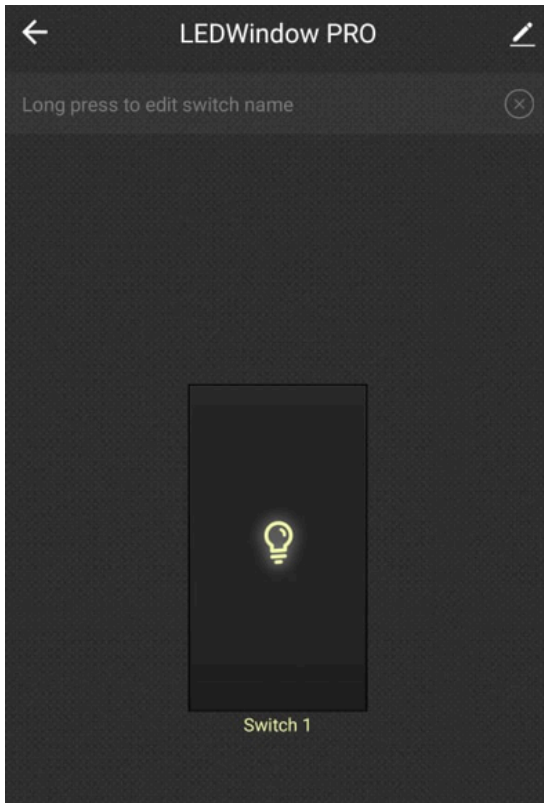

14. After a few seconds, it will find the Mini Switch Wifi (it may appear with a slightly different name):

15. Click on the pencil to the right, change the name to “LEDWindow” and click “done”:

16. Congratulations! Now just click on the icon on your cell phone screen to turn your LEDWindow on and off!

# Controlling via Alexa

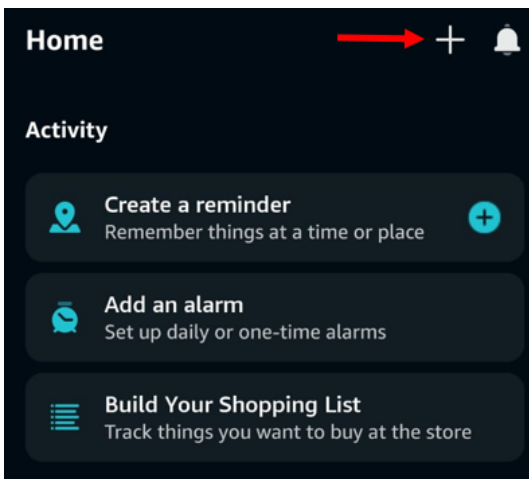

Your LEDWindow can be turned on with an “- Alexa, turn on my LEDWindow”! See how:

- 14.**Important step!** Install the JWCOM application following the steps in the previous tutorial: **“Controlling via the cellphone screen”**. Without these steps, Alexa will not work.

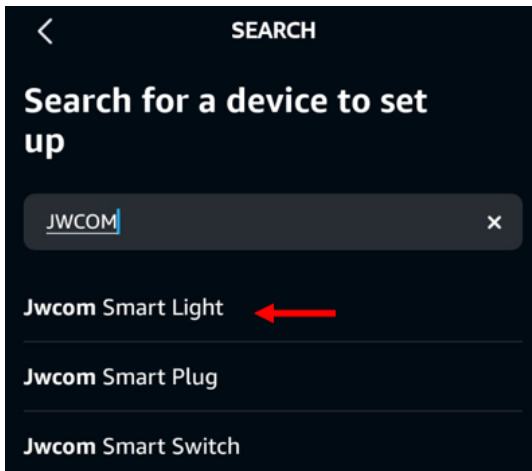

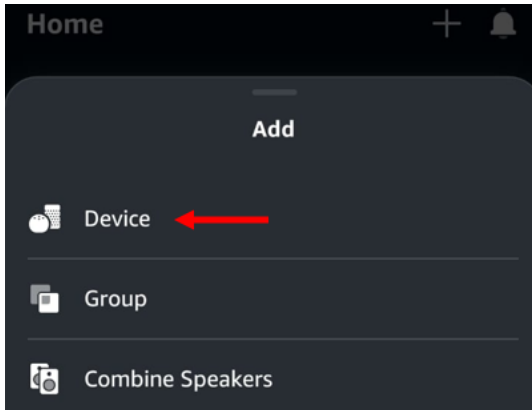

- 15.Log in to your Alexa app.

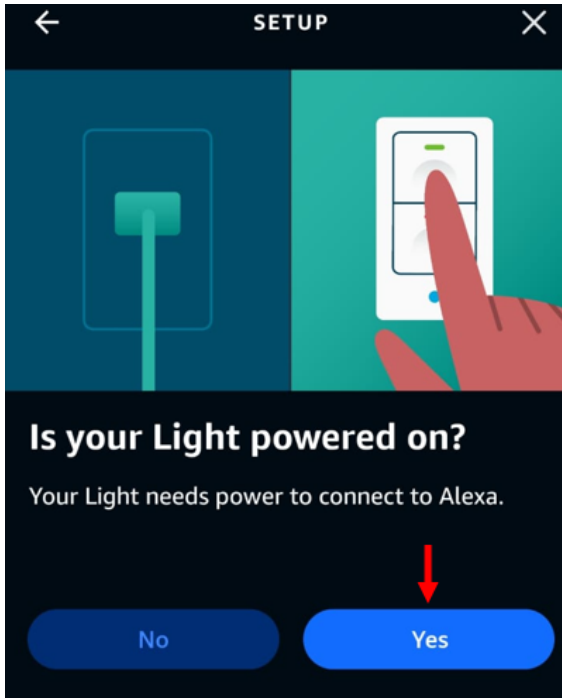

- 16.Click on “+” to add a device:

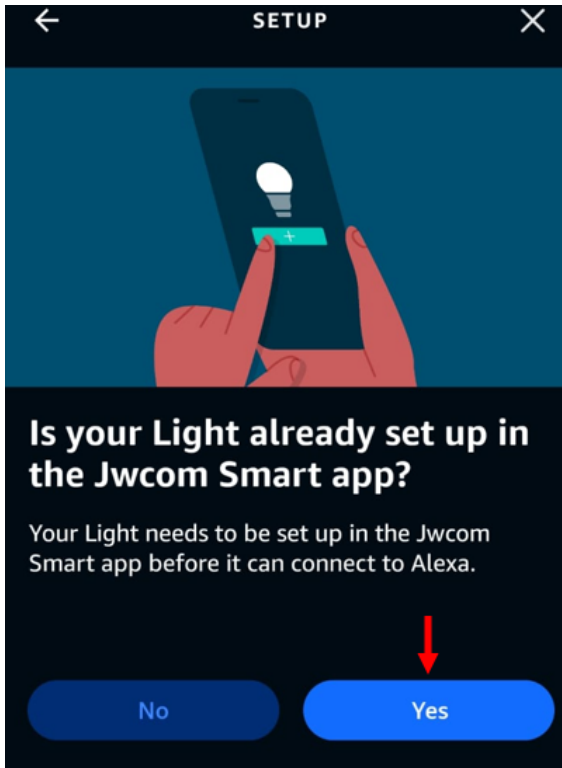

17. Click on “device” and look for “Jwcom Smart Switch”. When you find it, click on the name to start the discovery:

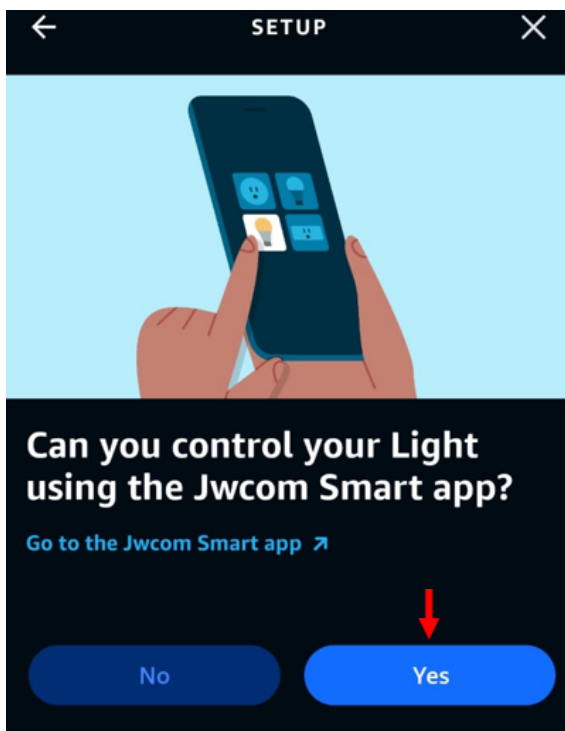

18. Turn on your LEDWindow and confirm:

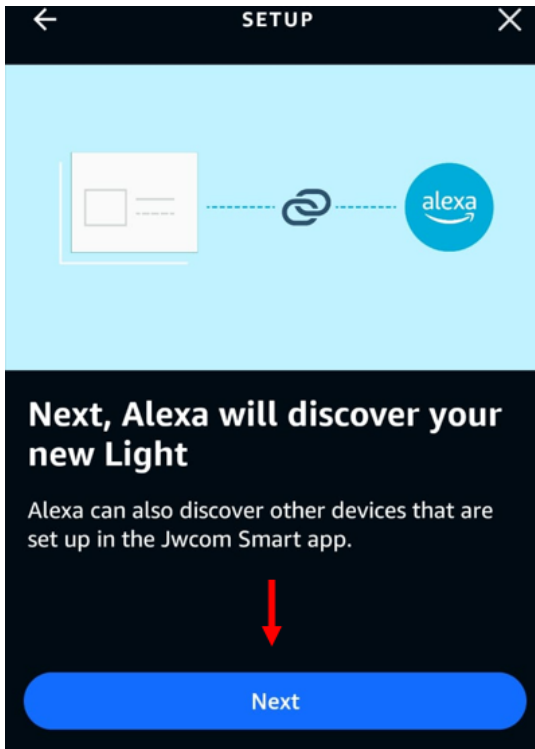

19. Confirm that you have already connected the LEDWindow in the JWCOM application:

20. Confirm that you can control the LEDWindow via JWCOM:

21. Now, Alexa will connect to the account you created in JWCOM:

22. When prompted, enter the e-mail your registered in the JWCOM account, your password, and keep clicking “Next Step”:

JWCOM SMART

Phone Number/Email Address ⇌  
→ contato@ledwindow.co

Type your password here ✕  
→ .....

→ Next Step

## 23. Grant Alexa authorization to control the JWCOM account:

contato@ledwindow.co

Alexa by Amazon will be able to:

Receive your public profile  
Control your devices over internet

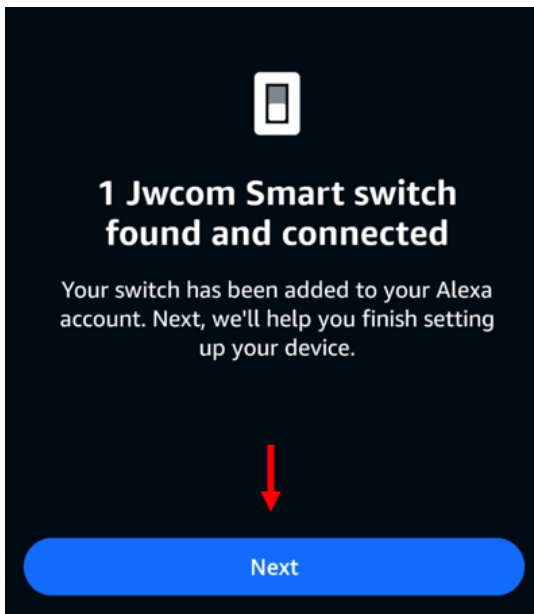

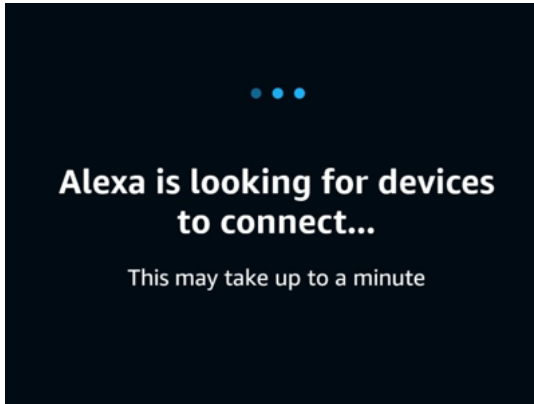

Authorize

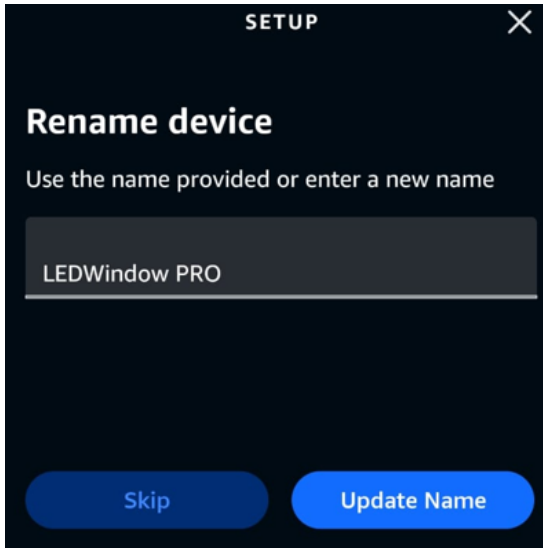

Deny

You can revoke permission at any time.

24. Alexa will search for the device through JWCOM and connect to your LEDWindow. Click “Next”:

25. If you wish, give a name for Alexa to recognize your LEDWindow. I suggest “LEDWindow” and the model name. It looks great! Ex.:

The screenshot shows a dark-themed 'SETUP' window with a close button (X) in the top right corner. The title 'Rename device' is displayed in white. Below the title, a subtitle reads 'Use the name provided or enter a new name'. A text input field contains the text 'LEDWindow PRO'. At the bottom, there are two blue buttons: 'Skip' and 'Update Name'.

SETUP

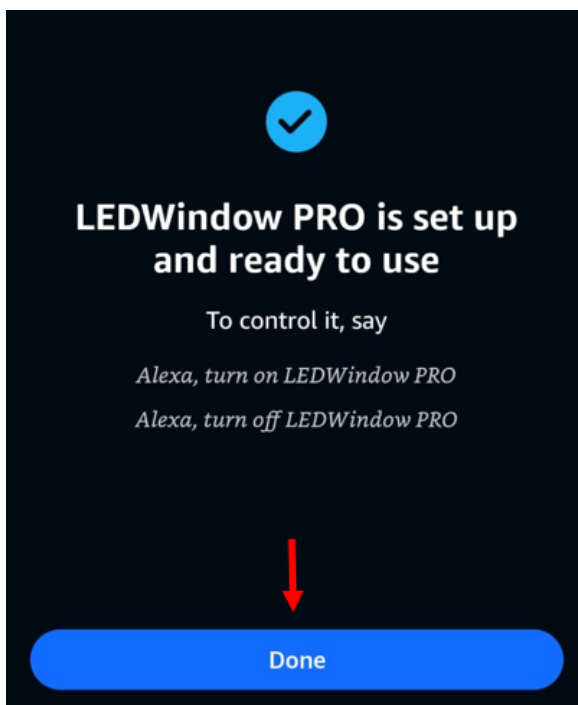

**Rename device**

Use the name provided or enter a new name

LEDWindow PRO

Skip Update Name

26. Your LEDWindow can be controlled by Alexa now!  
Click “finish”, and that’s it!

Here’s a tip! You can also say:

“- Alexa, turn on my LEDWindow in 10 minutes”  
(your clients will love it!). Or even:

“- Alexa, leave my LEDWindow on for two hours” (a  
good way for photo sessions time counting).
