O tecido mais fino da cortina, o voal, deve ficar voltado para baixo (para o lado do chão).

The thinnest curtain fabric, the sheer, should face down (the floor side).

Necessário duas pessoas.

Two people needed.

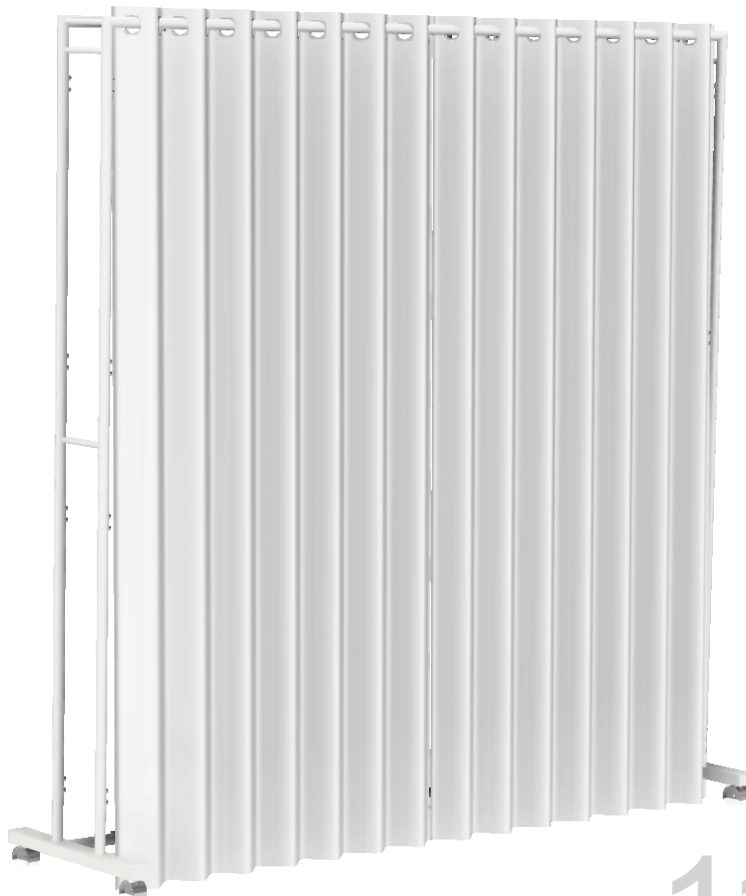

10

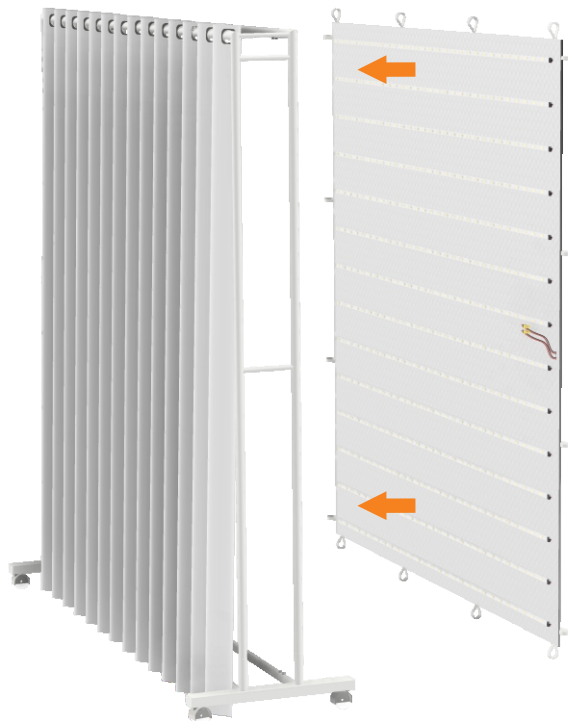

Aproveite para testar a estabilidade da estrutura. Caso esteja 'mole' ou 'com jogo', aperte os parafusos um pouco mais.

Take the opportunity to test the stability of the structure. If it is soft, tighten the screws a little more.

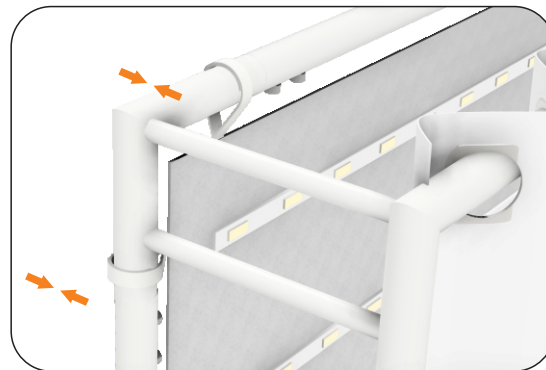

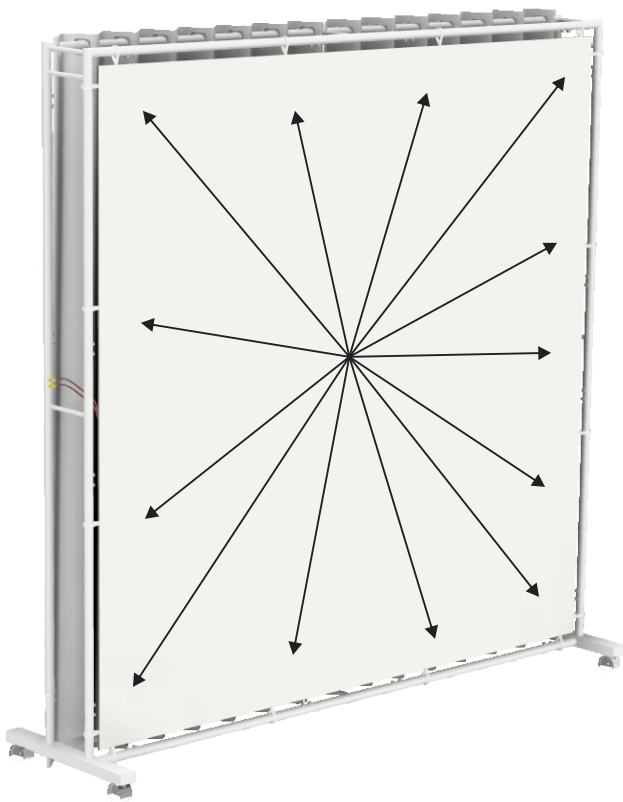

Os conectores podem ficar do lado que você desejar na estrutura, de acordo com as tomadas mais próximas no seu estúdio.

The connectors can be on the side you want in the structure, according to the closest sockets in your studio.

Aproveite para verificar se o refletor ficou bem esticado. Caso necessário, puxe e aperte mais as fitas de velcro.

Take the opportunity to check that the reflector was well stretched. If necessary, pull and tighten the velcro straps further.

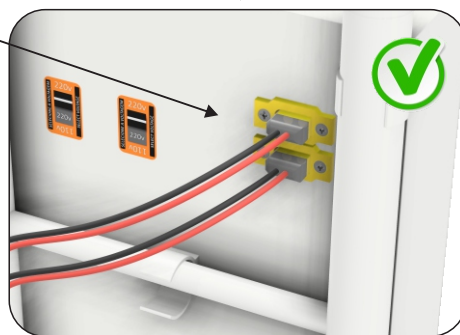

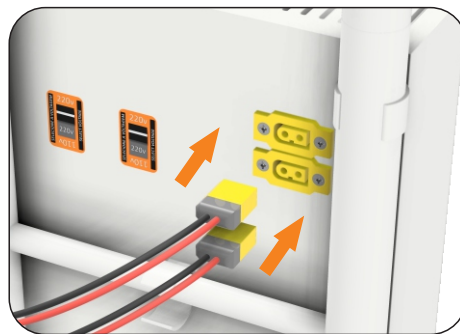

Aperte os conectores elétricos até o limite. Conectores mal encaixados podem ocasionar aquecimento.

Tighten the electrical connectors to the limit. Improperly connected connectors can cause overheating.

Parabéns! Sua
LEDWindow está
pronta para trabalhar!

*Congratulations! Your
LEDWindow is ready
for work!*
